

YellowPagesGoesGreen.org Introduces New Earth-Friendly White Pages

Newly-launched database will add WhitePagesGoesGreen.org to popular, fast-growing Web resource designed for everyone who prefers the convenience of searching for phone numbers and other information online.

([PRWEB](#)) March 14, 2013 -- YellowPagesGoesGreen.org, a business directory website in the vanguard of the Green movement and dedicated to preserving the earth's environment, announces the launch of [WhitePagesGoesGreen.org](#), another environmentally-friendly resource for finding information in today's fast-paced, digital world. Patterned after its successful web-based Yellow Pages service, White Pages takes the online directory a step further by offering its users the opportunity to locate both residential and business listings and information throughout the United States.

“Today we are thrilled to introduce our brand new online White Pages service,” announced Michael Keegan, president of Yellow Pages Directory, Inc. “White Pages is all about discovery, and will provide our users with a convenient resource for locating individual and residential listings in their own neighborhoods and cities, as well as across the country. It's the perfect complement to our already-established Yellow Pages platform, and we hope that our users will enjoy finding the information they need quickly and easily on WhitePagesGoesGreen.org.”

The new [WhitePagesGoesGreen.org](#) service adds more than 125 million listings to the popular and well-established Internet search tool YellowPagesGoesGreen.org. Yellow Pages already offers consumers throughout the United States the ability to connect with over 27 million businesses across the North American continent.

Yellow Pages Directory, Inc. is the owner of YellowPagesGoesGreen.org and PaperlessPetition.org. It provides an environmentally-friendly web-based alternative to bulky, wasteful paper telephone directories while offering an easy and convenient click-through mechanism allowing consumers to opt out from receiving printed yellow-book directories. Both YellowPagesGoesGreen.org and PaperlessPetition.org have been instrumental in promoting and providing opt-out awareness across the country over the past several years, giving users the ability to reduce their individual environmental footprints in the process. Yellow Pages Directory, Inc. has also taken steps to minimize its own impact upon the environment by employing the most up-to-date and energy efficient web-hosting services available.
